

MLC Building Committee
7 PM Sept 6, 2017

Present: Pastor Glenn, Dennis VanBatavia, Chris Wallace, Ron Moen, Roger Smith

The meeting started with prayer by Pastor Glenn.

Pastor Glenn and Roger Smith went over information received from the water flow tests. The flow unfortunately was not enough for the City to allow us to use the house on the property for an office and meetings. In order for building use (other than as a private residence) a fire hydrant with enough flow must be installed on the land.

Ron Moen and Roger Smith will be working with Global Water to determine the costs of putting a fire hydrant on the property. Global has been contacted and will be getting back with us.

Pastor discussed a need to have a plan for going forward. Such items on the plan should include:

- Research into costs and design for a sanctuary building.
- Where the building will be placed.
- How the land should be subdivided.

In the mean time a sign should be designed to tell people that WE OWN THE LAND! This sign should be 4 foot X 8 Foot in size. It should state the land is the future home of Maricopa Lutheran and state where we presently have Sunday services. It should be a two sided sign so that it can be read from travelers both North and South on White and Parker Rd. It was suggested that Evangelism Committee should design the sign.

The Fellowship Committee has recommended that we build a Pavilion on the property to have picnics etc. Once Fellowship comes up with design then research is needed on where to place it so that it would not be in the way when our final sanctuary is built.

It was decided that we need to get the ADA ramps over to the property. Pastor will advertise for help and we will meet at Barbs at 8AM on Saturday 30 Sept to move the ramp from both Barb's and the storage room where it is presently located.

Meeting was adjourned at 8:15 PM.

Ron Moen
Co-Chair Building Committee
